Selection: Compact Screw Compressors CS // CSV

Input Values

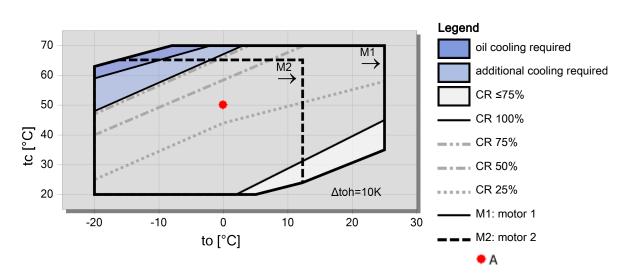

Compressor model	CSH7583-80Y
Refrigerant	R134a
Reference temperature	Dew point temp.
Evaporating SST	0 °C
Condensing SDT	50.0 °C
Liq. subc. (in condenser)	0 K
Suct. gas superheat	6.00 K
Useful superheat	100%
Operating mode	Standard
Power supply	400V-3-50Hz
Capacity control	100%
Additional cooling	Automatic
Max. discharge gas temp.	110.0 °C

Result

Compressor	CSH7583-80Y-40P
Capacity steps	100%
Cooling capacity	135.0 kW
Cooling capacity *	136.1 kW
Evaporator capacity	135.0 kW
Power input	48.5 kW
Current (400V)	83.5 A
Voltage range	380-415V
Condenser capacity	183.5 kW
COP/EER	2.78
COP/EER *	2.81
Mass flow LP	3697 kg/h
Mass flow HP	3697 kg/h
Operating mode	Standard
Liquid temp.	50.0 °C
Oil volume flow	1.08 m³/h
Cooling method	
Discharge gas temp. w/o cooling	72.9 °C

*According to EN12900 (10K suction gas superheat, 0K liquid subcooling, see tech. data/ notes)

Application Limits Standard CSH7583-80

Available Options
Oil level switch min / max OLC-D1-S (Option)
Discharge shut-off valve Option
Suction shut-off valve Option
Shut-off valve for ECO with muffler Option
Liquid injection with integrated nozzle Option
Bridges for DOL start Option
with sound jacket Option
Vibration dampers Option
Motor protection SE-i1 (200-690V)

BITZER Software v6.18.0 rev2811

Compact Screw Compressors CS

Reference points for evaporating and condensing pressures

Connection positions 1 (HP) and 3 (LP) on the compressor (see dimensions). The pressure drop for shut-off valves and check valves has not been taken into consideration. This is the worldwide state of the art for compact screws, as in factory-produced chillers shut-off valves are often omitted and the check valve can also be arranged as an external com-ponent in the discharge line. For the sake of the international comparability of performance data, this standard has been adopted for the screw compressors of the CSH/CSW/CSVH series.

ASERCOM certified performance data

The Association of European Refrigeration Component Manufacturers has implemented a procedure of certifying performance data. The high standard of these certifications is assured by:

- * plausibility tests of the data performed by experts.
- * regular measurements at independent institutes.

These high efforts result in the fact that only a limited number of compressors can be submitted. Due to this not all BITZER compressors are certified up to now.Performance data of compressors which fulfil the strict requirements may carry the label "ASERCOM certified". In this software you will find the label at the respective compressors on the right side below the field "result" or in the print out of the performance data. All certified compressors and further information are listed on the homepage of ASERCOM.

Legend of connection positions according to "Dimensions":

1 High pressure connection (HP) 2 Additional high pressure connection 3 Low pressure connection (LP) 4 Oil sight glass 5 Oil valve for maitenance (standard) / connection for oil equalisation (parallel operation) 6 Oil drain plug (motor housing) 7 CSH only, except CSH6583, CSH6593, CSH95103 and CSH95113: Connection for electro-mechanical oil level switch in case of replacing a CSH.1 by a CSH.3 8 Connection for opto-electronical oil level switch (OLC-D1-S) CSVH: integrated into FI control CS.105: connected to monitoring module 9 Oil heater with sleeve (standard) CSVH: integrated into FI control CS.105: connected to monitoring module 10 Oil pressure connection 11 External oil cooler connections (adaptor optional) 11a outlet to oil cooler 11b inlet / return from oil cooler 12 Oil temperature sensor (PTC) CSVH: integrated into FI control CS.105: connected to monitoring module 13 Economiser connection (ECO) (shut-off valve optional CSH: with pulsation muffler) 14 Threaded bore for pipe support CS.L line for ECO or LI CSVH: 14a line for ECO 14b line for FI cooling 15 Liquid injection connection (LI) (CSH: shut-off valve optional) 16 Earth screw for housing 17 Connection for oil and gas return (for systems with flooded evaporator adaptor optional) 18 Oil filter (maitenance connection) 19 FI cooling (liquid refrigerant) 20 Frequency inverter (FI) 21 Oil injection valve (internal) 24 Gas permeable plug SL Suction gas line DL Discharge gas line Dimensions can show tolerances according to EN ISO 13920-B.
